

JORDAN SCOTT

Technical Specialist

Address: Brooklyn, NY 11221

Phone: 917-618-0235

Email: jescott2398@gmail.com

SUMMARY

Results-driven IT professional with a strong background in systems administration, QA engineering, and software development. Experienced in supporting enterprise environments through Active Directory management, endpoint protection, automated testing, and cloud migration. Skilled in designing scalable workflows, data pipelines, and internal tools using Python, Docker, AWS, and modern frameworks. Adept at bridging IT operations and development, with proven success in reducing risk exposure, optimizing legacy systems, and ensuring system reliability. Seeking to leverage a multidisciplinary background to deliver secure, efficient, and resilient infrastructure solutions as a Systems Engineer.

SKILLS

Technical Skills: Python, C++, React, Git, SQL, AWS, CI/CD, Rest APIs, Active Directory, JavaScript, Flask, Docker, Linux (creating & managing multi-distro/server environments, Testing & QA, Agile/Scrum, Scripting (Bash, VBA), System Engineering **Certifications:** PCEP – Certified Entry-Level Python Programmer (Issued: Dec 2022)

WORK EXPERIENCE

Continental Stock Transfer and Trust - Technical Specialist, *New York, NY*

Sep 2022 - Present

- Delivered IT support while also contributing as a software engineer.
- Built data transmission pipelines and cleaned workflows via scripting, Docker, and AWS (S3).
- Designed and implemented and manage an internal invoicing system for DRS transactions using Python, VBA, and Excel.
- Led migration of multiple legacy applications to Flask and React-based platforms.
- Managed on-prem Active Directory, including GPO creation and policy administration.
- Assisted in revamping CST's change management system, promoting company wide visibility and optimization to limit downtime in transitional periods.
- Created cron job reporting dashboards to monitor transmission success rates.
- Maintained on prem corporate trust and document management system TranStar, building proprietary features in C++ on top of the industry standard recordkeeping system.

OpenCrowd - QA Engineer, *New York, NY*

June 2021 - May 2022

- Designed and executed test plans, test cases, and regression suites for enterprise financial and cybersecurity applications.
- Built automated test frameworks using Pytest and Selenium, increasing test coverage and reducing manual testing time.
- Conducted API testing for microservices and REST endpoints using Postman and Python scripts.
- Partnered with developers to identify, reproduce, and resolve defects in React dashboards and Flask-based services.
- Performed load, stress, and integration testing to validate cloud scalability on AWS.
- Contributed to sprint planning, QA documentation, and release readiness sign-offs in Agile environments.

Iterative Capital - Junior Developer, *New York, NY*

May 2019 - April 2021

- Supported engineering team in building a high-frequency OTC cryptocurrency trading platform.
- Developed and maintained Flask APIs and integrated Coinbase order books for real-time crypto data processing.
- Created unit tests with Pytest to ensure reliability and scalability.
- Contributed to the deployment of a secure authentication and authorization system via AWS.
- Collaborated in Agile workflows to deliver production-ready code under tight deadlines.
