

JORDAN SCOTT

Technical Specialist

Address: Brooklyn, NY 11221

Phone: 917-618-0235

Email: jescott2398@gmail.com

SUMMARY

Versatile software and systems engineer with experience delivering solutions directly within enterprise environments, bridging technical implementation and stakeholder collaboration. Proven ability to embed with operational, engineering, and non-technical teams to diagnose complex problems, implement practical solutions, and drive adoption of platform capabilities. Experienced in building and supporting production systems, automating workflows, and modernizing legacy applications using Python, cloud services, and containerized tooling. Strong communicator with a consultative mindset, adept at translating customer needs into technical execution while partnering closely with product, engineering, and customer success teams to deliver measurable, high-impact outcomes.

SKILLS

Technical Skills: Python, C++, React, Git, SQL, AWS, CI/CD, Rest APIs, Active Directory, JavaScript, Flask, Docker, Linux (creating & managing multi-distro/server environments), Testing & QA, Agile/Scrum, Scripting (Bash, VBA), System Engineering **Certifications:** PCEP – Certified Entry-Level Python Programmer (Issued: Dec 2022)

WORK EXPERIENCE

Continental Stock Transfer and Trust - Technical Specialist, New York, NY

Sep 2022 - Present

- Embedded with internal business, operations, and engineering stakeholders to deliver technical solutions that addressed time-sensitive operational and compliance needs.
- Acted as a technical implementer and advisor, diagnosing workflow, data quality, and system integration issues and delivering pragmatic solutions through custom development and automation.
- Designed and implemented data transmission pipelines using Python scripting, Dockerized services, and AWS (S3), enabling reliable ingestion, validation, and reporting across internal teams.
- Led the end-to-end design, implementation, and ongoing maintenance of a DRS invoicing platform built with zero external financial overhead, generating over \$4M in net revenue within one year and directly contributing to the company's bottom line.
- Built and owned internal transaction and invoicing systems in close collaboration with finance and operations teams, translating complex business requirements into auditable, maintainable software solutions.
- Led last-mile modernization of legacy applications to Flask-based services and React frontends, improving usability, maintainability, and adoption by end users.
- Partnered with operations and leadership to improve change management practices, increasing visibility into deployments and reducing risk during production transitions.
- Developed monitoring and reporting workflows to surface transmission failures and operational issues early, enabling faster triage and resolution.
- Supported and extended a mission-critical trust and document management platform (TranStar), developing proprietary C++ enhancements and serving as a point of escalation for complex issues.

OpenCrowd - QA Engineer, New York, NY

June 2021 - May 2022

- Designed and executed test plans, test cases, and regression suites for enterprise financial and cybersecurity applications.
- Built automated test frameworks using Pytest and Selenium, increasing test coverage and reducing manual testing time.
- Conducted API testing for microservices and REST endpoints using Postman and Python scripts.
- Partnered with developers to identify, reproduce, and resolve defects in React dashboards and Flask-based services.
- Performed load, stress, and integration testing to validate cloud scalability on AWS.
- Contributed to sprint planning, QA documentation, and release readiness sign-offs in Agile environments.

Iterative Capital - Junior Developer, New York, NY

May 2019 - April 2021

- Supported engineering team in building a high-frequency OTC cryptocurrency trading platform.
- Developed and maintained Flask APIs and integrated Coinbase order books for real-time crypto data processing.
- Contributed to the deployment of a secure authentication and authorization system via AWS.

EDUCATION

Worcester Polytechnic Institute, Computer Science
