

JORDAN SCOTT

Technical Specialist

Address: Brooklyn, NY 11221

Phone: 917-618-0235

Email: jescott2398@gmail.com

SUMMARY

Systems-focused IT professional with experience spanning systems administration, platform operations, QA engineering, and software development in enterprise environments. Proven ability to design, support, and optimize reliable infrastructure with a strong emphasis on availability, performance, and security. Hands-on experience with Linux-based systems, Active Directory, endpoint protection, cloud platforms, and automated tooling, complemented by strong scripting and automation skills in Python and Bash. Adept at identifying and mitigating performance and reliability risks, modernizing legacy systems, and supporting mission-critical services through disciplined documentation, monitoring, and escalation support. Brings a collaborative, operations-driven mindset that bridges infrastructure and development teams to deliver scalable, resilient platform solutions.

SKILLS

Technical Skills: Python, C++, React, Git, SQL, AWS, CI/CD, Rest APIs, Active Directory, JavaScript, Flask, Docker, Linux (creating & managing multi-distro/server environments), Testing & QA, Agile/Scrum, Scripting (Bash, VBA), System Engineering **Certifications:** PCEP – Certified Entry-Level Python Programmer (Issued: Dec 2022)

WORK EXPERIENCE

Continental Stock Transfer and Trust - Technical Specialist, New York, NY Sep 2022 - Present

- Delivered enterprise IT and platform support while contributing as a software engineer, supporting business-critical systems with a focus on availability, performance, and operational stability.
- Designed and maintained automated data transmission pipelines using Python-based scripting, Dockerized services, and AWS (S3), improving reliability and observability of internal data flows.
- Engineered and supported an internal transaction and invoicing platform using Python and Excel/VBA, emphasizing data integrity, auditability, and operational resilience.
- Led the modernization and migration of multiple legacy applications to Flask-based backend services and React frontends, improving maintainability, scalability, and deployment consistency.
- Administered on-premises Active Directory environments, including Group Policy design and enforcement, access controls, and security policy management.
- Contributed to the redesign of enterprise change management processes, increasing cross-team visibility, reducing operational risk, and minimizing downtime during production transitions.
- Built scheduled monitoring and reporting solutions (cron-based) to track data transmission success rates and surface operational issues proactively.
- Maintained and extended a mission-critical on-premises trust and document management platform (TranStar), developing proprietary C++ enhancements on top of an industry-standard recordkeeping system.

OpenCrowd - QA Engineer, New York, NY

June 2021 - May 2022

- Designed and executed test plans, test cases, and regression suites for enterprise financial and cybersecurity applications.
- Built automated test frameworks using Pytest and Selenium, increasing test coverage and reducing manual testing time.
- Conducted API testing for microservices and REST endpoints using Postman and Python scripts.
- Partnered with developers to identify, reproduce, and resolve defects in React dashboards and Flask-based services.
- Performed load, stress, and integration testing to validate cloud scalability on AWS.
- Contributed to sprint planning, QA documentation, and release readiness sign-offs in Agile environments.

Iterative Capital - Junior Developer, New York, NY

May 2019 - April 2021

- Supported engineering team in building a high-frequency OTC cryptocurrency trading platform.
- Developed and maintained Flask APIs and integrated Coinbase order books for real-time crypto data processing.
- Created unit tests with Pytest to ensure reliability and scalability.
- Contributed to the deployment of a secure authentication and authorization system via AWS.
- Collaborated in Agile workflows to deliver production-ready code under tight deadlines.

EDUCATION

Worcester Polytechnic Institute, Computer Science
