

JORDAN SCOTT

Technical Specialist

Address: Brooklyn, NY 11221

Phone: 917-618-0235

Email: jescott2398@gmail.com

SUMMARY

Hands-on systems engineer with experience designing, deploying, and maintaining business-critical infrastructure in enterprise and financial services environments. Skilled in monitoring complex systems, responding to incidents, troubleshooting performance issues, and implementing optimizations to ensure high availability and reliability. Experienced collaborating with developers, analysts, and business teams—including finance, accounting, and trading groups—to support operational workflows, data pipelines, and technical projects. Adept at automating repetitive processes, building observability tools, and tuning systems for performance and scalability, with a strong ownership mindset and a focus on minimizing downtime and maximizing efficiency in production environments.

SKILLS

Technical Skills: Python, C++, React, Git, SQL, AWS, CI/CD, Rest APIs, Active Directory, JavaScript, Flask, Docker, Linux (creating & managing multi-distro/server environments), Testing & QA, Agile/Scrum, Scripting (Bash, VBA), System Engineering **Certifications:** PCEP – Certified Entry-Level Python Programmer (Issued: Dec 2022)

WORK EXPERIENCE

Continental Stock Transfer and Trust - Technical Specialist, New York, NY

Sep 2022 - Present

- Monitored and maintained business-critical infrastructure and internal financial systems, ensuring high availability, reliability, and performance for operational and revenue workflows.
- Responded promptly to system alerts and production incidents, diagnosing root causes, implementing solutions, and establishing processes to prevent recurrence.
- Built and maintained automated data pipelines, reporting dashboards, and monitoring workflows using Python, Docker, and AWS, improving observability and reducing manual intervention.
- Led the end-to-end design, implementation, and ongoing maintenance of a DRS invoicing platform, translating financial rules into automated system logic, and generating over \$4M in net revenue in its first year.
- Optimized system performance across compute, network, and application layers, identifying bottlenecks and implementing tuning strategies to improve throughput and responsiveness.
- Partnered with finance, accounting, operations, and research teams to support new workflows, technical initiatives, and production data analysis.
- Supported the modernization of legacy applications and workflows, migrating to Python-based services and web interfaces to improve scalability, maintainability, and operational efficiency.
- Served as a primary point of escalation for complex production issues, providing technical guidance, troubleshooting support, and operational insight across business-critical platforms.
- Documented system logic, workflows, and dependencies to support auditability, knowledge transfer, and long-term sustainability of financial and operational systems.

OpenCrowd - QA Engineer, New York, NY

June 2021 - May 2022

- Designed and executed test plans, test cases, and regression suites for enterprise financial and cybersecurity applications.
- Built automated test frameworks using Pytest and Selenium, increasing test coverage and reducing manual testing time.
- Conducted API testing for microservices and REST endpoints using Postman and Python scripts.
- Partnered with developers to identify, reproduce, and resolve defects in React dashboards and Flask-based services.
- Performed load, stress, and integration testing to validate cloud scalability on AWS.
- Contributed to sprint planning, QA documentation, and release readiness sign-offs in Agile environments.

Iterative Capital - Junior Developer, New York, NY

May 2019 - April 2021

- Supported engineering team in building a high-frequency OTC cryptocurrency trading platform.
- Developed and maintained Flask APIs and integrated Coinbase order books for real-time crypto data processing.
- Contributed to the deployment of a secure authentication and authorization system via AWS.

EDUCATION

Worcester Polytechnic Institute, Computer Science
